

2026 Seedling Distribution

Our crop selection for this year's City Harvest program strikes a balance between historical varieties, heirlooms, industry standards, staff favorites, and popular choices from our network of gardeners. As always, we are committed to providing you with the most reliable selection of NOP-compliant seeds and transplants. While many of our offerings from 2025 remain available, we've also introduced exciting new varieties for you to discover and explore.
